ALEXANDER ANDREEV

FRONT END ENGINEER

OVERVIEW

Highly motivated and experienced software engineer with a passion for creating exceptional products and a track record of leading teams to success. Expertise in Angular Framework and ReactJS, with a deep understanding of UI/UX design principles and experience designing and developing user-centric products with thousands of users. Proven ability to work in teams and effectively communicate with clients. Prior experience in online banking and gaming, familiar with working in highly-regulated environments. Interested in remote contracting opportunities with US-based companies. Have experience working remotely and as a contractor.

WORK EXPERIENCE

Front End / Full Stack Engineer
Sirma Solutions (2015 - 2019)

- Spearheaded development of highly scalable and customizable customer/file management software using AngularJS (Sirma Enterprise Platform)
- Developed crucial user login and settings flow for Raiffeisen Bank in Poland using OpenUI and led the creation and implementation of internal management projects for government agencies using Angular 2+
- Demonstrated ability to lead a development team and effectively communicate with clients, delivered projects on-time, within budget and with high-quality standards.

Integration Consultant
Deloitte (2019 - 2020)

- Led the technical implementation of a new core banking system for CSOB bank (Part of KBC Group) as part of an international Deloitte consulting team
- Expertly crafted and presented technical documents and analysis for processes such as customer onboarding and mortgage approvals, driving successful adoption and implementation of new systems.
- Articulately communicated and defended technical approaches to stakeholders, effectively managing timelines and deliverables, and successfully navigated a complex and dynamic international team environment.

Lead Front End Engineer
SnG Services (2020 - 2021)

- Directed the full-spectrum development and management of an enterprise-level e-learning platform focused on cognitive bias with dynamic video and other multimedia content using Angular2+ and Spring Java.
- Acted as front-end lead for the development of an international banking software portal for Temenos, expertly managing and leading a dynamic and cross-functional development team.
- Demonstrated expertise in planning and executing the architecture and development cycle for large-scale, high-complexity projects in a dynamic and fast-paced environment.

Senior Front End Engineer
Playtech 2021 - 2023

- Led the development of high-performance web-based poker client for multiple casinos worldwide, in a competitive and regulated environment.
- Developed advanced and highly dynamic software using ReactJS, handling over 10,000 concurrent users across different devices and platforms, while maintaining performance and user experience.
- Utilized expertise in graphics design and animation, crafted responsive and visually stunning animations using different formats (SVG, Canvas) and delivered them seamlessly across different devices and browsers.
- Communicated effectively with cross-functional teams, stakeholders and mentored junior developers.
